Construction Notice

Project: Schoolhouse Road, New Britain Township 16" Water Main Installation

North Penn Water Authority (NPWA) will begin the construction of a new 16" water main on Schoolhouse Road between Trewigtown Road and Railroad Avenue in New Britain Township the week of March 9, 2020.

Project Summary:

This new water main will enhance the public water supply and fire protection to the residents of the Township.

After completion of the water main installation in the utility right of way, all disturbed soil and blacktop will be restored to its' original condition.

We anticipate the construction work for the water pipe to take approximately 2 weeks to complete, weather permitting.

Timeline:

Wednesday March 11, 2020 - Mobilization and construction will begin.

Questions:

Please call Jim Sharayko, NPWA Construction Superintendent, at 215-855-3617 Monday through Friday between 8:30 am and 4:00 pm.

Customer Impact:

In order to ensure the public and workers' safety, traffic control will be implemented during the hours of work (7:00 am – 4:00 pm).

At the end of each workday, the both lanes will be open and traversable.

School buses, emergency vehicles and residents will have access to their homes, but may experience minor delays in some instances.

We will make every effort to keep unobstructed access open to local residents to the fullest extent possible.

We have notified the School District and your local emergency response units to assure they will have access and that your essential services are not interrupted.

For your protection, we have videotaped the property frontage of your curbs, sidewalks, blacktop, lawns and driveways to ensure that any damage that may be caused is restored to a condition that is at least equal to the current condition. All concrete, blacktop, or grassy areas that are dug up will be restored.

Our Commitment:

We regret any inconvenience that you may experience during this period. This improvement project is part of our ongoing, asset management plan to replace older water mains in order to continue to provide our customers with high quality drinking water and adequate fire protection.
