ARBORICULTURAL SUMMARY JUDGMENT

December 2, 2025

To: Mr. D. Travis North, RLA

Sr. Project Manager, Landscape Architecture & Planning
Bohler

1600 Manor Drive, Suite 200
Chalfont, PA 18914

Reference: ARBORICULTURAL INVENTORY REPORT

Hanover Project – New Britain Township, PA

File: 6837JRH

Prepared by: Rockwell Urban Forestry - John Hosbach Jr., RCA

1. Purpose of Study

At the request of Bohler, Rockwell Urban Forestry performed a comprehensive tree inventory of all trees 6 inches DBH (diameter at breast height) or greater located within the designated Hanover project area in New Britain Township, Pennsylvania.

- ☐ The purpose of this assessment was to:
- ☐ Identify all qualifying trees by species and DBH
- ☐ Evaluate overall tree health and structural condition
- ☐ Record defects, hazards, and decline indicators
- ☐ Determine municipal compensation requirements

Provide a data-driven summary to support land-use planning, permitting, and mitigation strategies

All work was performed in accordance with ISA BMPs and ANSI A300 standards.

2. Inventory Overview

A total of 1,360 trees ≥ 6 " DBH were identified and recorded. Data collected included species, size, condition rating, and structural defects.

Total Trees Recorded: 1,360

3. Species Composition

The site is overwhelmingly dominated by Ash, Wild Cherry, and Black Walnut, which together represent more than 64% of all trees on the property

Primary Species Composition – Hanover Project

Species	Count	Percent
Ash	407	29.9%
Wild Cherry	269	19.8%
Black Walnut	196	14.4%
Boxelder	98	7.2%
Pin Oak	87	6.4%
Red Maple	71	5.2%
Elm	44	3.2%
Hickory	32	2.4%
Norway Maple	26	1.9%
Silver Maple	22	1.6%
Crabapple	18	1.3%
Mulberry	16	1.2%
Eastern White Pine	13	1.0%
Red Oak	9	0.7%
Honeylocust	6	0.4%
Pear	5	0.4%
Callery Pear	4	0.3%
Sugar Maple	4	0.3%
Sycamore	4	0.3%
Willow	4	0.3%
Eastern Redcedar	3	0.2%
Hawthorn	3	0.2%
White Oak	3	0.2%
Catalpa	2	0.1%
Colorado Blue Spruce	2	0.1%
Holly	2	0.1%
Additional Minor Species (<0.2%)	—	—

610-731-7969

john@rockwellurbanforestry.com

Sassafras, Black Oak, Black Locust, Chestnut, Douglas Fir, Hemlock, Linden, Sweetgum – all present in very low density.

4. Condition Summary

The overall condition of the woodland is poor, driven primarily by the large Ash population in various stages of EAB decline.

Condition Summary Tables

Condition – Tree Count

Condition	Count	Percent
Fair	173	12.7%
Poor	669	49.2%
Dead	518	38.1%
Total	1,360	100.0%

Condition – Total DBH Inches

Condition	Total Inches
Fair	2,054
Poor	8,708
Dead	7,771
Total Inches	18,533

The high volume of dead and declining trees represents significant ongoing risk and natural woodland attrition.

5. Defects & Structural Observations

A variety of structural defects were documented throughout the site. Many trees exhibited multiple overlapping issues.

JOHN ROCKWELL HOSBACH JR.

Urban Forester

ISA Certified Arborist PD-0372

610-731-7969

john@rockwellurbanforestry.com

Defect Summary Table

Defect Type	Count
Dead	518
Structural Defects	222
Decay / Decline	209
No Significant Defects	173
Excessive Lean	112
Codominant Stems	73
Invasive Species	30
Unbalanced Crown	20
Root Issues	2
Seam / Crack	1

The high volume of defective material corresponds heavily with Ash decline and storm-related failures.

6. Municipal Compensation Summary

Trees were evaluated relative to New Britain Township's woodland and tree-protection requirements.

Compensation Eligibility Summary

Category	Tree Count	Inches
Compensation Required	173 trees	2,054 inches
No Compensation Required	1,187 trees	16,479 inches
Total	1,360 trees	18,533 inches

Only a small portion of the overall woodland qualifies for compensation due to condition, species, and ordinance thresholds.

7. Conclusions & Key Findings

- ☐ **Ash Decline Dominates the Site**
Nearly 30% of the inventory are Ash trees, most in poor or dead condition due to long-term Emerald Ash Borer impacts.
- ☐ **Woodland Health is Poor**
With nearly 87% of the trees classified as poor or dead, this woodland is in a phase of natural transition and degeneration.
- ☐ **High Hazard Potential**
More than 900 trees show structural issues, decay, excessive lean, or codominant unions.
- ☐ **Compensation Quantities Are Manageable**
Only 173 trees qualify for mitigation, representing 2,054 inches.

8. Closing

We appreciate the opportunity to assist Bohler with this important component of the Hanover project. Please feel free to contact our office with any questions.
